## Design Boosts Chances for Air-Powered Motorcycle

July 08, 2010 / <http://alternative-energy-resources.info/wind-power-news/design-boosts-chances-for-air-powered-motorcycle/> - 13 hours ago

Die-hard advocates of alternate power might fantasize about cars that could one day run on water. But scientists in India have gone a step further. They've mathematically modeled an engine that should allow a motorcycle to run on air—compressed air, that is. Their design is described in the Journal of Renewable and Sustainable power .
