Engineering Advancement for Nation Building"*

MESSAGE

I am happy indeed to learn that the Institution of Engineers (India), UP State Centre & School of Management Sciences - Technical Campus, Lucknow are jointly organizing a two day Seminar on 'Sources of Planet Energy, Environment & Disaster Science' (SPEED-2019) on February 07-08, 2020. This is the 7th Seminar in the series and this time the Seminar will mainly focus on 'Impacts of Non-Conventional Energy Resources'. It is true that over exploitation of our planet's natural resources affects ecological balance leading to many miseries to mankind including climate change. These have not been identified till now in case of exploitation of Non-Conventional Energy Resources. Hope the seminar will deliberate in detail these issues and come out with strategic recommendations to limit the damage to environment etc. by over exploitation of natural resources for generating non-conventional energy.

I congratulate Prof. (Dr.) Bharat Raj Singh & his entire team for their untiring efforts to make this Seminar successful. I also compliment Mr. Sharad Singh, CEO & Secretary, SMS for his whole hearted support for technical activities.

I extend my best wishes for the success of the Seminar on a very relevant & important topic which is going to provide a platform for all stake holders to share their views & experiences and come out with definitive recommendations to save our mother earth.

(V. B. Singh) FIE
