MESSAGE

I am happy to learn that the School Of Management Sciences, Lucknow which has been imparting engineering and management education in Science for long years ago is organising **5th International Seminar on “Sources of Planet Energy, Environmental & Disaster Science (SPEED) : Impact of Non- Conventional Energy Resources”** on 7th Feb. to 8th Feb. 2020 in their premises of the Institute in Lucknow.

Man due to his need and greed has done many activities that not only harm the environment but himself too. Many plant and animal species got extinct due to human activity. Human activities that harm the climate include deforestation, using fossil fuel, industrial waste, a different type of pollution and many more. All these things damage the climate and ecosystem very badly. And many species of animals and birds got extinct or on a verge of extinction due to hunting. These climatic changes have a negative impact on the environment and there will be a heavy loss to the whole living and non-living system. Impact of Renewable & Non-Conventional Energy Resources, Preservation of Natural Resources, Natural Disaster Management, Low Carbon technology Development & transfer and control of global humanitarian loss etc major issues are biggest challenges of the 21st century. In light of benefits of mankind, our Scientists, Technologists and researchers can maintain the pyramid of healthy and longer life in the planet.

I am sure that participating scientific and technological intellectuals would discuss , share and achieve the objectives during various brain storming sessions of the seminar.

I extend my best wishes for the entire endeavours.

23.01.2020
(Dr.Vedpati Mishra)
